1. QUALITY AND ENVIRONMENT POLICY

The Quality and Environmental Policy established by the Executive Management for its commercial activities covering the ***procurement, receipt, inspection, storage, logistics management, and supply of spare parts, components, and materials for the aeronautical, aerospace, and defense industries***, as well as its industrial activity dedicated to the provision of engineering services including analysis, design, development, management, software development, and control of manufacturing systems, equipment, tooling, and complex structures applicable to the aerospace, defense, simulation, rail, marine, automotive, and nuclear sectors, , reflects the interest of the organization to achieve and demonstrate a solid performance and quality environmental management and to meet the needs of their customers, meeting their requirements and trying to exceed their expectations.

While our business does not produce a significant impact on the environment, the organization is aware of the growing and current environmental issues and, as a supporter of sustainable development, is committed to the prevention, protection and conservation of the environment in all its activities.

The guidelines and objectives set out in this document, in relation to Quality Management and the Environment, part of the General Policy of the company and are consistent with it; continue to apply to the entire organization.

These guidelines are:

- *Pursue excellence in our products and services based on the requirements of the **ISO 9001:2015, EN 9100:2018, and EN 9120:2018** standards applicable to each activity, ensuring full compliance with quality objectives, **product safety, prevention of counterfeit parts, and ethical behavior**.*
- Continuous improvement of the System of Quality Management and Environment and the prevention of pollution by collecting and analyzing data to identify areas for improvement, so as to establish objectives and goals consistent with purposes of the company.
- Maintaining a high level of quality in service delivery and related activities.
- Promoting the selection of contractors and suppliers to adhere to Management Systems and Environmental Quality, certified by independent entities.
- Comply with each and every one of the requirements of applicable laws and regulations concerning quality and environment, as well as meeting the requirements of our customers.
- Focus the quality management and environmental management for more and better control of the timing and costs associated with the projects in order to increase the capital of the organization and continue growth in the sector.
- Train staff of the organization and promote environmental awareness of them as our suppliers, so as to maintain a high level of competence and involvement in the achievement of objectives and appropriate behavior with respect and care for the environment, informing them of the importance of your attitude toward it.
- Promote research, development and the use of new technologies and processes in order to avoid or minimize environmental impacts and systematically reduce waste, recycle and reuse whenever possible and use natural resources efficiently, raw materials and energy.
- Focus Quality Management and Environmental Management as a means of differentiating it from other companies in our field of activity.
- Contribute to the fight to stop climate change, apply all possible improvements in the reduction of resources consumed and with an adequate management of waste

*In order to fulfill these commitments, the Organization operates an Integrated Quality Management System based on the requirements of the **ISO 9001:2015**, **EN 9100:2018**, and **EN 9120:2018** standards, and maintains its Environmental Management System under the **ISO 14001:2015** framework. .*

The Directorate is responsible for the availability of resources necessary to carry out these activities and expects all staff, whatever their role and job, share this commitment to quality and respect for the Environment, in strict compliance with the guidelines set out in this document.
